## ABOUT US

### What we are and What we are doing

The **European Movement Saxony** is a non-partisan civil society organisation in the field of European politics in the Free State of Saxony founded in December 1992. Its member organisations represent a cross-section of groups in society: economic and professional organisations, political parties, and others.

The European Movement pools, strengthens and reinforces its members' know-how and activities in the field of European politics. With reference to current political issues, the network brings politics, politicians and organised civil society together. Since 2003 we confer the award "Sächsischer Europapreis" in respect to extraordinary and exemplary engagement in European affairs in Saxony.

### We are member of the **NETWORK EUROPAEN MOVEMENT GERMANY**

The Network European Movement Germany and its more than 200 member organisations allow Germany to know and represent its interests in Europe – and for Europe to become more interesting and relevant in Germany!

The Network European Movement offers:

- European communication between politics, politicians and organized civil society
- European perspectives and political agenda-setting
- European education and public relations work
- Information, dialogue and consultation

Should there be need to extend the debate, the European Movement is active in 43 countries right across Europe.

Becoming a member organisation and being a member organisation of the Network European Movement Germany offers a multitude of advantages: political relevance, communication potential and international presence! Members have space to develop their own European profile, European news and European experts – on our website and always in direct contact with us.
